

Configuring your Mobile Device for VPN Access

To configure your mobile device to access the SUNY Cortland network using VPN, you must install the Cisco AnyConnect "App". To install the App, search the App Store for **Cisco AnyConnect**. Select the appropriate iPhone or iPad App and select the **Install** button. After installed, start the AnyConnect App on your device.

To configure AnyConnect for VPN access to the SUNY Cortland network, select the **Add VPN Connection** option. Give the connection a description such as SUNY **Cortland** and specify the server address **vpn.cortland.edu**. Save the connection. To connect, choose the SUNY Cortland connection and slide the **AnyConnect VPN** option from **Off** to **On**.
