Browsing All Videos in our Classic Catalog

1. Log into myRedDragon. Go to the “Library” tab. Choose “Classic Catalog”. Click on “Search” while keeping the search box blank. *In order to browse the catalog you have to do an “Advanced” search, which requires you to gain access to the main catalog page. Clicking “Search” will send you directly to the main catalog.*

2) Click “Advanced” search

3) From here click on “Document Type” by clicking the down arrow in the first field and then clicking “Document Type.” Next, type “Video” in the field to the right of it, as shown. Then Click “Go”
4) You will get a results page that looks like this below. It is arranged from most recent to least recent. If you click on Title, it will change the sort order to alphabetical according to Title. If you click Author, it will change the sort order to alphabetical according to Author. If you click on “Online Access” in the “Call Number” column, it will take you to the streaming online video. If a title does not have “Online Access” then it is not a streaming video.

*Notice the number of records! You can jump to a number, by typing the number in the box after “Jump to #”. I noticed that in a title sorted results page, #600 took one to “F.”
