Test Availability Exceptions

eLearning Blackboard Learn 9.1 for Faculty

A great new feature in Blackboard Learn SP13 is Test Availability Exceptions.
When deploying a test, on the Test Options page, you will see a new option on the list

3. Test Availability Exceptions

Exceptions can be made for individual or groups of students, customizing each of the availability rules on a per-student basis.
*NOTE: If you choose to sort by groups, please make sure to make the group unavailable if you do not want students to see who is in the group.
*NOTE 2: The Timer and Force Completion options must already be enabled in the standard rules in order to set them in the exceptions.

Start by clicking Add User or Group and on the pop-up window, select the users or groups that you want to add exceptions to. They will be listed in the options.

From this set, you can choose the number of attempts, timer for a single student, and availability dates specific for that student.
