

**Professional Licensure Disclosure**  
**SUNY Cortland**  
**Program: Bachelor of Science in Geology**

New York State prides itself in the high quality of its licensed and certified professionals. For the protection of its citizens, each license and certificate has requirements that individuals must meet to be licensed or certified in New York State. SUNY's academic programs leading to licensure or certification are carefully designed to meet and exceed these State requirements. Other states frequently have their own requirements, so if your goal is to practice in another state, this disclosure will help you check to see what that state requires.

Per U.S. Federal Regulations, §668.14 and §668.43, and in compliance with the State Authorization Reciprocity Agreements ([SARA Policy Manual](#)), SUNY Cortland provides the following disclosure related to the educational requirements for professional licensure and certification.

SUNY Cortland cannot provide verification of an individual's ability to meet licensure or certification requirements unrelated to its educational programming. Such individual determinations are made by state licensing boards and are fact-specific determinations. This Disclosure is strictly limited to SUNY Cortland's determination of whether its educational program, if successfully completed, would be sufficient to meet the licensure or certification requirements in a State.

This disclosure does not provide any guarantee that any particular state licensure or certification entity will approve or deny your application. Furthermore, this disclosure does not account for changes in state law or regulation that may affect your application for licensure and occur after this disclosure has been made.

SUNY Cortland has designed an educational curriculum, B.S. in Geology, that if successfully completed is sufficient to meet the education requirements for licensure in New York as a Professional Geologist.

New York State Education Department, Office of Professions Information
