CAREER POTENTIAL

Areas of opportunity:

Counseling or therapy
Research
Human services
Organizational psychology
School psychology

→ *The Psychology Department also offers minors requiring 18 to 21 credits in forensic psychology, psychology and psychology of individuals with disabilities.*

PROGRAM HIGHLIGHTS

SUNY Cortland psychology majors immerse themselves in the study of human behavior, considering how people perceive the world, personal motivations, how the brain works and many other topics. A psychology degree can lay the groundwork for graduate study and for careers in research, counseling and other areas of applied psychology.

HANDS-ON OPPORTUNITIES

Students can earn academic credit to pursue independent research projects and work with valuable equipment such as an electroencephalogram (EEG) machine. They also have the opportunity to observe in schools, neuroscience labs and social services centers.

FACULTY WHO MAKE A DIFFERENCE

Psychology professors are multi-talented experts on topics such as educational psychology, personality, abnormal psychology, learning, cognition, emotion, neuroscience, psychopharmacology and psychology of the exceptional child.

By the numbers

35

awards honoring student excellence in the department
→ *Awards recognize research as well as achievements by juniors, seniors and non-traditional students.*
